

Great choice! Cloud computing and AWS (Amazon Web Services) are highly in-demand skills. Here's a structured **roadmap** for you to start your cloud computing journey with a focus on **AWS**, along with **guided resources (videos + websites)** for each stage.

Cloud Computing + AWS Beginner Roadmap (With Guided Resources)

◆ **Phase 1: Cloud Computing Basics**

Topics to Learn:

- What is Cloud Computing?
- Types of Cloud Models: Public, Private, Hybrid
- Service Models: IaaS, PaaS, SaaS
- Benefits & Use Cases

Learn:

- [YouTube - Simplilearn: Cloud Computing for Beginners](#)
 - [FreeCodeCamp: Intro to Cloud](#)
-

◆ **Phase 2: Introduction to AWS**

Topics to Learn:

- What is AWS?
- AWS Free Tier Account Setup
- AWS Global Infrastructure: Region, AZ, Edge Locations

Learn:

- [AWS Skill Builder \(Free Courses\)](#)
 - [YouTube - AWS in 10 mins](#)
 - [AWS Free Tier Setup Guide](#)
-

♦ Phase 3: Core AWS Services

Focus Areas:

1. **Compute** – EC2, Lambda
2. **Storage** – S3, EBS, Glacier
3. **Databases** – RDS, DynamoDB
4. **Networking** – VPC, Route 53, ELB

Learn:

- [YouTube - FreeCodeCamp AWS Full Course \(13 hrs\)](#)
 - [Tutorials Dojo – AWS Cheat Sheets](#)
 - [AWS Documentation: Services Overview](#)
-

♦ Phase 4: IAM, Security, and Monitoring

Topics:

- IAM Users, Roles, Policies
- CloudWatch & CloudTrail
- AWS Shared Responsibility Model

Learn:

- [YouTube - IAM for Beginners](#)
 - [AWS IAM Docs](#)
-

♦ Phase 5: Hands-On Practice

Do:

- Launch an EC2 instance
- Host a website on S3
- Set up a Lambda function
- Create a VPC with subnets
- Build a serverless app

Platforms:

- [AWS Cloud Quest \(Interactive Game\)](#)
 - [Qwiklabs \(Now part of Google Cloud Skills Boost, also has AWS labs\)](#)
-

♦ Phase 6: Certification Path (Optional but Recommended)

1. AWS Certified Cloud Practitioner (*Beginner-Friendly*)

- [AWS Official Exam Guide](#)
- [YouTube - Andrew Brown's Full Course \(Free\)](#)
- [Tutorials Dojo Practice Exams](#)

2. Next Certifications:

- **AWS Solutions Architect Associate**
 - **Developer Associate / SysOps Associate**
-

◆ **Bonus Phase: Real Projects & GitHub**

- Deploy a static website on S3 + CloudFront
 - Setup CI/CD with CodePipeline and CodeDeploy
 - Create a serverless REST API using API Gateway + Lambda + DynamoDB
 - Contribute your code and projects on GitHub
-

Would you like a **Notion template** / **PDF** version of this roadmap? I can also track your progress weekly and update resources if needed. Let me know!
